Front-end software engineer with 3.5 years building Fortune 10, production-grade web applications used by millions. Specialized in Angular, React, Next.js, and TypeScript. Delivered near-100% Vitest coverage on critical healthcare workflows, drove WCAG 2.1 compliance at enterprise scale, maintained a full DevSecOps pipeline, and engineered a decoupled questionnaire engine deployed across 9,000+ locations.

WORK EXPERIENCE

Software Engineer

June 2024 – Present

CVS Health (Fortune 10), Remote

- Engineered customer-facing scheduling flows on CVS.com serving millions of users — integrating AEM content fragments into an Angular rendering pipeline and reducing cumulative layout shift on high-traffic pharmacy pages.
- Built core scheduling logic for the Pharmacy Appointment Scheduler — overnight time-slot configuration, edge-case modal flows, and high-volume state management in Angular, deployed across 9,000+ CVS locations.
- Developed Health Hub service-creation platform in React with a test-first approach using Vitest — achieving near-100% coverage on all critical workflows and zero regressions at launch.
- Maintained DevSecOps pipeline: Snyk vulnerability scanning, GitLeaks secret rotation, Docker base image upgrades, CircleCI optimisation, and Harness deployment management.

Front-End Engineer

June 2023 – June 2024

CVS Health (Fortune 10), Remote

- Architected the Intelligent Questionnaire Engine (IQE) in React/Next.js — conditional branching via declarative rule config, dynamic form state managed entirely in React, and a decoupled question schema enabling new questionnaire types without code changes.
- Engineered complex API-driven, multi-step form logic with reusable component architecture — scaling data-driven intake workflows across CVS.com without per-workflow code changes.
- Led WCAG 2.1 accessibility remediation across CVS.com PDPs — auditing and fixing ARIA roles, semantic HTML, keyboard navigation, and colour contrast; acted as squad's designated a11y reviewer; established review criteria adopted as the team's ongoing standard.

Software Engineer Intern

May 2022 – Dec 2022

Insight Enterprises Inc (Fortune 500), Remote

- Built a client portal integrating external ITSM platforms with internal systems using React and RESTful APIs — designing reusable UI components that streamlined cross-platform workflows.
- Developed internal device-management automation tooling across Jamf, Workspace ONE, and Microsoft Intune, managing large-scale deployments and authoring onboarding documentation.

EDUCATION

Arizona State University, Tempe, AZ

December 2022

Bachelor of Science — Graphic Information Technology

Focus: Front-End Development & UX

GPA: 4.0, Summa Cum Laude

SKILLS & OTHER

Technical Skills: Angular, React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Sass, Node.js, Express.js, PostgreSQL, REST APIs.

Tools: GitHub, Docker, CircleCI, Harness, Jest, Vitest, Snyk, GitLeaks, Adobe Experience Manager (AEM), Postman.

Practices: WCAG 2.1 Accessibility, Component Architecture, Test-Driven Development, CI/CD, DevSecOps, Agile/SAFe.

Languages: English (Native), Hungarian (Conversational), German (Conversational).
