Front-end engineer with 3.5+ years building production web applications used by millions at CVS Health (Fortune 10). Specialized in Angular, React, Next.js, and TypeScript, with deep experience in accessible, well-tested enterprise UI and REST API integration. Led WCAG 2.1 remediation as squad a11y reviewer across high-traffic healthcare scheduling and intake workflows.

WORK EXPERIENCE

Front-End Software Engineer

June 2024 – Present

CVS Health (Fortune 10), Remote

- Develop front-end features for the Appointment Management Tool, an Angular/RxJS application CVS uses to manage pharmacy vaccine scheduling, appointment closures, time-slot availability, and operational reporting across 9,000+ pharmacy locations.
- Built dynamic data tables, filtering and sorting, multi-step forms, client-side validation, and user-facing error handling, integrating REST APIs and partnering with backend, QA, design, and product teams.
- Engineered React/Next.js features for Chronos AI — AI-session workflows, iframe embedding, token handling, route-specific SSO-bypass logic, and Angular/Next.js integration — and built D3/Observable data visualizations.
- Wrote unit tests with Vitest, Jest, and React/Angular testing tools across components, services, user flows, and edge cases; troubleshoot CI/CD pipelines (CircleCI, Harness) and Docker-based local development.

Front-End Engineer

June 2023 – June 2024

CVS Health (Fortune 10), Remote

- Built the Intelligent Questionnaire Engine (IQE) in React/Next.js for healthcare intake — rules-based conditional workflows, question editing and related-question logic, grouped navigation, soft-delete handling, confirmation modals, and save flows.
- Remediated WCAG 2.1 accessibility issues across CVS.com customer-facing product detail pages (React/Next.js) — ARIA roles, semantic HTML, keyboard navigation, screen-reader behavior, and UI consistency; served as the squad's a11y reviewer and set review criteria adopted as team standard.

Software Engineer Intern

May 2022 – Dec 2022

Insight Enterprises Inc (Fortune 500), Remote

- Built a client portal integrating external ITSM platforms with internal systems using React and RESTful APIs — designing reusable UI components that streamlined cross-platform workflows.
- Developed internal device-management automation tooling across Jamf, Workspace ONE, and Microsoft Intune, managing large-scale deployments and authoring onboarding documentation.

PROJECTS

Heritage Passport Finder — citizenship-by-descent research website (built and launched)

- Designed and shipped the full front end solo — product structure, responsive design, content, SEO, and end-to-end user flows.

EDUCATION

Arizona State University, Tempe, AZ

December 2022

Bachelor of Science in Graphic Information Technology

Focus: Front-End Development & UX

GPA: 4.0/4.0, Summa Cum Laude

SKILLS & OTHER

Technical Skills: Angular, React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Sass, RxJS, REST API integration, D3.js/Observable, Node.js, Express.js, PostgreSQL.

Tools: GitHub, GitLab, Azure DevOps, Docker, CircleCI, Harness, Jira, Confluence, Postman, Figma, Adobe Experience Manager (AEM), Snyk, Storybook.

Practices: WCAG 2.1 Accessibility, Component Architecture, Front-End Unit Testing (Vitest, Jest, RTL), Responsive Design, CI/CD, Agile/Scrum. Languages: English (Native), Hungarian (Conversational), German (Conversational).
